

Flexible LED light

P# CBFLEXLED - Flexible 1200mm LED light IP67 4000k natural white

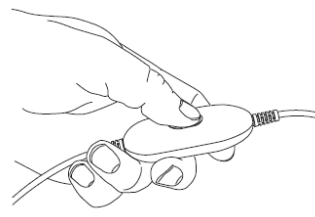

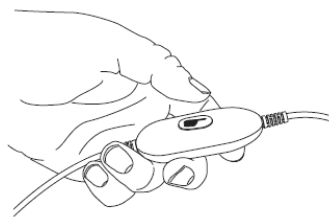

Operating instructions

This highly flexible and versatile LED light is ideal for camping and general outdoor lighting. The LED casing has an IP65 rating, including the variable powered controller.

The flexible LED light is made up of 72 high intensity SMD 5730 LED's which will provide sufficient light for almost any application.

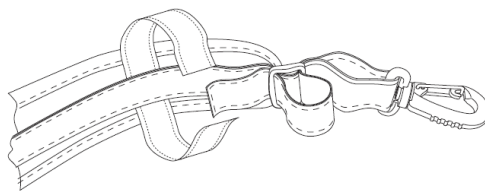

The powered controller is touch sensitive to operate:

- Tap the middle section of the controller  once, to turn on to the last pre-set setting or hold until desired intensity is achieved
- Tap again to turn off or hold to change intensity
- To change power setting hold until desired intensity is achieved, every time you touch the switch the intensity direction changes

NOTE: The variable powered controller remembers the last pre-set setting.

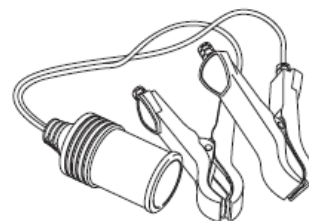

This light is extremely versatile, equipped with two fully adjustable durable hooks at either end of the light casing, enabling adjustment of up to 200mm (8 inches) for each end.

Four straps on the back of the casing conveniently enable the light to be affixed to any rigid support up to 50mm (2 inch) in diameter.

SPECIFICATIONS:

- High intensity 5730 SMD LEDs
- Natural white colour temperature of 4000k
- 5.5 meter (18ft) cable with 12v cigarette lighter plug
- Waterproof rating including switch of IP65
- Input voltage: 12v DC
- Power: 15w
- Lumens: 1600Lm
- Current draw: 0.7 amps @ 12v
- LED strip length 1200mm (47 ¼ inches)
- Weight: 400 grams (14.1oz)

Utility socket and alligator clips included
